WHAT IS BIM?
 Building Information Modeling (BIM) is an intelligent 3D model-based process that gives architecture, engineering, and construction (AEC) professionals the insight and tools to more efficiently plan, design, construct, and manage buildings and infrastructure.

WHY BIM?
 Get skilled with AutoCAD, Revit MEP, NavisWorks & other design softwares. Bridge the gap between academics and jobs by becoming 100% Job-Ready. Greater demand vs. Lower supply of Skilled Professionals.
