

About the Journal

The J. C. Bose Journal of Engineering, Technology and Sciences (JCBJETS) is a peer-reviewed, international open-access journal. It serves as a platform for disseminating fundamental and cutting-edge research across all branches of engineering, technology, and allied sciences.

Published bi-annually, the journal features original research articles, case studies, and review papers encompassing both experimental and theoretical studies. It maintains a rigorous and constructive peer-review process, facilitated by an extensive network of expert reviewers, ensuring the highest standards of scientific integrity and authenticity.

Committed to ethical publishing practices, the Journal upholds stringent editorial policies to safeguard the credibility and robustness of published research. The editorial team actively supports authors throughout the publication process, fostering an environment of scholarly excellence.
