Subject: Educating the needy in society

Vivekanand Manch strongly believes in the ideology of their role-model “Swami Vivekanand” that “Education is for everyone, and ever has a right to get educated” started TEACHING NEEDY program. The program was started with an aim to teach the financially backward children who in spite of having a lot of potential, could afford to go to a school. The children were provided with books and all other necessary items by the members of Vivekanand Manch. Till to date, Vivekanand Manch has made education accessible to more than 60 talented needy children. Even during the lockdown induced due to COVID-19 pandemic, Vivekanand Manch had provided books and various stationery etc to the children so that their studies weren't affected by COVID-19 pandemic. Khusbhoo Sharma, a student of “Teaching Needy” program was also provided with an android mobile phone, which was bought after taking voluntary contributions from Vivekanand Manch members, to continue with her school online classes during the lockdown. Vivekanand Manch feels blessed to get this opportunity of teaching and helping these talented children who in long run will become responsible citizens of the country and will definitely contribute in our country's development. Around 40 students have taken the initiative and taught students turn wise.
